Portfolio

Summary

Aspiring Full-Stack Developer with solid front-end expertise in React.js, Tailwind CSS, Firebase, and Firestore. Strong foundation in programming fundamentals and SQL. Eager to expand skills in Java, Spring, Oracle, and Agile methodologies to contribute to full-stack software projects in collaborative environments.

Education

MCA, Bharat-Ratna Indira Gandhi College of Engineering, Solapur   Aug 2024 – Present
BCA, Punyashlok Ahilyadevi Holkar Solapur University, Kondi   Aug 2020 – July 2024

Projects

E-Commerce Product Page – Live — GitHub

– Built a responsive e-commerce page with cart, wishlist, and orders using React.js and Firebase Firestore.

– Used Git for version control and followed Agile principles during development.

Movie Search App – Live — GitHub

– Developed a movie search app integrating IMDb API, React Hook Form, and Firebase Authentication.

– Implemented efficient search handling and user authentication features.

Weather App – Live — GitHub

– Created a responsive weather application using WeatherAPI and React.js with dynamic visuals and real-time data.

Hospital Management System – GitHub

– Developed a standalone Python/MySQL application to manage patients, appointments, and generate reports.

Technical Skills

Languages: JavaScript, Python, SQL, Java
Web Technologies: HTML, CSS
Frameworks & Libraries: React.js, Tailwind CSS, Bootstrap, Axios, React Hook Form, Lucide Icons
Databases: Firebase Firestore, MySQL, Oracle (basic)
Tools: Git, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse
Platforms: Firebase (Authentication, Hosting), Familiar with Agile workflows
